Short summary of idea*

Add Historic Waiting Lists to New Events with the same Qcode

Application/Area

Events

Description

When I add a new event it would be great to see who is on the waiting list for the same Event Qcode. This would enable me to then add them immediately to the new event, either in the permissions section and or Event attendee or waiting list screen - enabling me to fill my course with a previous waiting list.

It could be done easily by adding a button in the Edit screen above permissions like "Add previous people who have not attended and are on the waiting list" - and then when I tick the "Send/Update Notifications" box it will send them all an invite - awesome! (I appreciate that will not book them on, but at least they know they are not forgotten and can check if they can come and Join).

At the moment I have to remember to search the history of events, find one with the same Qcode (which in itself is tricky as there is no sort for Qcode Events), then check the waiting list, then transfer that to the new event, and then repeat this for every event with that Qcode that there has ever been in case someone joined a waiting list and was missed - It takes forever!
