Short summary of idea*

Allow "Public" IC Forms to be excluded from list of Forms when user is logged in.

Application/Area

Infocapture

Description

Currently we have various Registration forms, 6 in total. They all relate to a user requesting an account. However, registered users WITH an Account also see these forms and there is no way to disable them - I raised ticket number 020398 for this and was told that you cannot set "Public" without "All Registered" also being enabled. However these are irrelevant for registered users.

Generally too, our own requirements aside, I think it makes sense to be able to separate the two.
