## Short summary of idea\*

Knowledgebase: Embed view for knowledgebase article

### Application/Area

Knowledge Base

### Description

An embed view for knowledgebase articles would be nice to see for content in e-learning modules e.g

\* /knowledgebase/articles/11?embed=true

or

\* /knowledgebase/articles/11/embed

This would then bring up a minimal view of the knowledgebase article with photo, title and content. It would be a simple and functional way to integrate knowledgebase as a content source.

We have certain bits of knowledge that need to be learned by some departments but also accessible for reference by the whole company. Hiding them away in e-learning is not the best solution and duplicating the content would make it difficult to maintain. While we could include it as a link, it would be nice to have the content in the page.
