Short summary of idea*

Add a note to the search function

Application/Area

People

Description

I have had this comment from one of our users on the search function when searching under people -

I actually didn't use the search function when I tried earlier because all I could see was the term: Name – so I thought it was only going to search for a known name. I didn't realise the dropdown had all those options.

Just adding a note to that search function along the lines of:

Search Excello lawyers and support teams by name, practice area, keyword etc would help to prompt people? It's not quite intuitive at the moment.

Is this something you could elaborate on or advise if we can amend?
