Short summary of idea*

It would be nice to be able to view the org chart vertically and to be able to select/deselect viewable options.

Application/Area

OrgChart

Description

Currently the org chart is displayed horizontally and expands to the right and to the bottom. It would be great to be able to change the view/configuration so the org chart is displayed vertically. The top box would be centered within the screen and the org chart would expand to the right as well as the left and the bottom.

Additionally, it would be nice to be able to toggle on/off some existing options (picture, title, email icon, email) as well as adding addition options (department, phone number, and even have a few lines entered about each individual).

Thanks for your consideration :-).
