Short summary of idea*

Meeting Room Bookings

Application/Area

Room Booking

Description

The repeat option for room bookings only allows you to book the same DATE each month (which sometimes falls on a weekend = non business day) ideally we would need the repeat option to allow us to book, for example, the first Tuesday of the month or last Friday of each month....etc.

In addition, some of the meetings in the repetition series can sometimes change at last minute, we would like to be able to move one meeting within the series without having to cancel the whole series of meetings.

Further to this, as administrator, I have the option to view and manage ALL bookings however when I am deleting a booking on someones behalf I cannot filter the list of bookings by room or by the person who has booked or by date. It would be great to have a search of filter facility here so I don't have to trawl through 60+ pages of room bookings to find the one I need to delete.
