Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.
Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.
If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*
Enabling rules for date fields in InfoCapture to not conflict

Application/Area
Infocapture

Description
When creating a form in InfoCapture that uses multiple date fields (using fields to represent 'from' and 'to' dates for example) there is no logic to prevent these dates to not conflict.

To set up a scenario - if you had created a training request form that had to date fields to determine the timeframes in which the training would start and end, you cannot stop to 'training end' date being set earlier than the 'training start' day. It would be nice to be able to use the constraints option or something similar to be able to prevent this.

Original request submitted:

- apply validation on the date field: 'Date from' cannot be later than 'Date to' field
- apply validation on 'Date From', which should be at least 6 days later than the current date.
