Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*

Expand Shown Daily items in Week, Month view

Application/Area

Calendar

Description

Currently we only see the number of events that day (+2, +6). Would prefer at least 3-5 to always be displayed. Or better yet, give the admin control over how many can displayed.

We are a smaller company (under 50 employees). On our previous intranet calendar 4-5 events per day were visible immediately, with a + only showing after a certain amount. It made viewing the calendar quickly much simpler.

when we open the calendar now all we see are +2, +6, etc for everyday, making more steps for us to find out what is happening that day, week or month.
