Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*

Make Policy Manager Tags Searchable Within Policy Manager

Application/Area

Policy Manager

Description

Currently, the search field within Policy Manager only searches document titles and document descriptions, but not tags assigned to a policy document. However, the tags are included in a search if one uses the global intranet search field. Suggest making the search parameters the same in Policy Manager, where tags (at the least) and body text (would be great) are also included.
