Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

### Short summary of idea\*

Let Policy Manager tag or search results = all policies, not just "my policies"

### Application/Area

Policy Manager

### Description

We do not find the "My Policies" aspect of Policy Manager useful. We use policy manager to manage P&P's, but most of our policies are universal to our employees at large, and so we use "All Policies" as our landing page.

That said, when someone either uses the Policy Manager app search bar to search for a keyword, or uses the tag cloud, the only results that pop up are for "My Policies", which for our purposes is zero. It would be better if all policy manager results showed, rather than being restricted.
