Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

## Short summary of idea\*

Hide Holiday/Vacation Day Type

## Application/Area

Calendar

## Description

We have it setup so people can see the "Who's Out" component on the main page (Shows today and tomorrow) and then on another page a Calendar to see who is out over the next 2 weeks.

We had some complaints that others didn't need to see the "type" of absence people have: IE: Paid Vacation Day, Unpaid Vacation Day, etc. Claromentis provided me with some CSS to apply that modified the Who's Out component and hid this info. Thanks for that!

We were informed that it cannot be hidden on the calendar component though because: "the title and label are together and can't be separated out".

So we wanted to submit the idea to allow this info to be hidden there as well. By checkbox, by CSS or by whatever method we can accomplish this task.

Thanks,  
Mike
