Short summary of idea*

Infocapture - Form field placeholders / Error hinting / Phone number format

Application/Area

Infocapture

Description

I would like to be able to use Placeholder text when creating form fields in Infocapture. Also, it would be nice if you were able to create custom error hints when using a regular expression to guide users on the specific format the form field is requiring.

Ideally, I also wish there was phone field format, to help users enter phone numbers in the desired format. :)
