Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

### Short summary of idea\*

Increase the metadata options available on the 'People List' component on pages

### Application/Area

Pages

### Description

I would like to add email to the metadata on the people component on our pages but it is not available and there is no way to add it.

The ideal solution would be for all people user profile fields to be available for selection in the 'People List' component (this might get a bit busy) or for a way the admin could make certain ones available.

Also, if the email field was available and when added became an active link to launch an email to the designated person, that would be ideal.
