Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*

Allow Image Gallery to be viewed as a Slider

Application/Area

Image Gallery

Description

It would be nice if, after uploading several photos to an image gallery, that we could then display it as a slider on any page. There is a slider application on the back end or admin side, that we can create a new one, but the dimensions available are really not user friendly or compatible with alot of photos, and also one has to upload one photo at a time. It would be much easier or simpler to be able to add a slider widget functionality to the image gallery app. Also, the current widget the provides a link to an image gallery can't be resized on a page. It looks kind of weird.
