Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*

Infocapture: To display the meta data related to a user

Application/Area

Infocapture

Description

This was my scenario:

I am creating a performance and development review form which will be started by the manager and they select their employee.

I want to pull through the job title for the employee, as this is already in the system I don't want the submitter to have to retype it in the form.

If I use the existing variables for user, it pulls through the submitters details rather than the selected employee.

It would be good to display the meta data associated with the employee (user) variable.
