Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*

Enhanced Copy Paste for Images

Application/Area

General

Description

When creating knowledge base articles or announcements, we have screenshots and images that we need to be able to easily load into the article. I'm concerned and we're getting ready for launching Claromentis to our entire company that by requiring users to uploading images to the server, they will simply not use Claro and send an email instead. If there is a way to enhance the the process of pasting or including images without having to do a one-by-one upload, it would save a tremendous amount of time.
