Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*

Bulk update user fields on Documents (for when a user leaves)

Application/Area

Documents

Description

Have the ability to bulk update user fields (including meta data fields) to change the user for when a user leaves or changes job role.

We have author and reviewer metadata fields as well as the standard owner field.

At the moment not even the owner field is updated if you delete a user. Ideally we don't want to delete a user when they leave, but disable them and there is no option to replace the user in this scenario.
