Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

### Short summary of idea\*

Sending links for changing password instead of just entering username

### Application/Area

### Description

As it is now, if you know the username of an account you can reset our passwords just by entering the username.

It would be better if there would be sent a link to e-mail instead, which only resets the password when it is clicked. It would make it more secure and controllable who changes the password.
