Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.
Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.
If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*

Better filters on an Infocapture Ticket List component

Application/Area

Infocapture

Description

Currently you can only filter by 1 field.
It would be good to filter by multiple fields, e.g. status and date last modified (it would be good if dates in filters could be dynamic as well, but I will raise that as a different idea).

Or perhaps the list could be based on an advanced search criteria or a report
