Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*

Prevent users accepting policies after a set 'expiry date'

Application/Area

Policy Manager

Description

Let managers set a 'expiry date' that will prevent users from accepting a policy after a set 'expiry date'.

Currently, there is functionality that enables managers to Set 'status expiry Date' however this functionality only will show the how many days left before the policy expires and also once the date has been reached, then it will show how many days ago that the policy has expired.

This isnt really helpful as users can still accept the policy after the expiry date.

There is currently a workaround where mangers can manually untick the 'Targeted Distribution' for specific roles and groups however if we have over 100 policies, then this really isnt feasible as it will take too long to disable.

A potential solution would be for the system to remove the 'Target Distribution' role for specific roles/groups after the expiry date has been reached.
