Description
https://neighborhood.amerifirst.com/i...ions.php (https://neighborhood.amerifirst.com/intranet/search/admin_suggestions.php)

On the back end where we manage search recommendation results, there is no sort capability of the groups that we have created, and they do not sort alphabetically, they just seem to remain in the order that they were created. This makes it difficult to go back and edit any group we have created because it's time-consuming to look through and find the group you are looking for.
