Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*

Provide an application to display the detail of the latest blog post

Application/Area

Blog

Description

In addition to the existing blog application (which displays a list of the latest blog posts), would it be possible to provide an application that displays only the latest blog post in full, a bit like it would within an iFrame?

That would help bringing a strong focus (in the midst of a dashboard-type of homepage) on a specific communication, from the leadership for example.
