Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.
Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.
If you have an immediate need for a feature please submit a Change Request instead.

**Short summary of idea***
Automatically create a project from IC

**Application/Area**
Infocapture

**Description**
It would be great to have a marketplace module that allowed a project to be created ( In claromentis projects app ) when a form reaches a named status
That project should be created by copying from a template project or copying another project as options
The software should also create a link to that project in a specific named field in the IC project.
