Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

### Short summary of idea\*

COVID Status tile

### Application/Area

General

### Description

I have been working on a COVID status tile to display on our front page so that people have a central location to see the COVID levels/safety mandates at any of our offices quickly. It's just a simple table with one cell per office, all color-coded red, yellow, or green. Right now I have to go into the HTML and change the color coding for each cell to update the level, but maybe a little scripting could turn this into a tile that would let you change colors more easily? I think there is an obvious need for something like this.
