Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

### Short summary of idea\*

Menu Builder: Sub Menu Expansion Not Intuitive

### Application/Area

Menu Builder

### Description

People are having issue with the way the second to third sub-menus opens.

Currently to get to the third menu item you: Hover over the top menu item. Second level submenu automatically appears. Hover over the second level submenu text and it does nothing. Instead you have to click a small "Greater Than" symbol to expand out its sub menus. That's not a very smooth way to navigate.

I would like it so you just hover over the text and submenu items automatically appear without have to click a symbol to expand it out.

Thank you.
