Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.
Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.
If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*

Editors subscribing users to an existing Discussion

Application/Area

Discuss

Description

When someone creates a Discussion, they can choose to subscribe new users.
We have a discussion board that with a list of participants that change regularly, as program participants change.
Our users will access the discussion on a page - they are not accustomed to using the Discuss app.
I want to subscribe users to an existing Discussion, so they are notified.
There are 2 workarounds, each with an issue:
1. Delete the Discussion and make a new one. This allows me to subscribe the right people, but it requires me to use a new Discussion.
2. Tell people to subscribe in the Discuss app. No matter how easy I make it for people, most users will not willingly subscribe to a Discussion.
This problem makes Discussions ineffective at accomplishing their intention, since the normal user will not actively check Discussions.
