Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*

Audit Log Email Notifications

Application/Area

Audit

Description

We would like the ability to receive an email when certain errors trigger in the audit log. For example our user sync was failing for over 2 days with the audit log under system/user showing the failure to sync every hour but we never got notified about it from Claromentis. A user had to put in a support ticket for us to find out. The ability to get notified in some way about system failures would be most appreciated.
