Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.
Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.
If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*
Separate out Quiz notifications from Poll & Survey application

Application/Area
Quiz

Description
The quiz application is separate, but there are no notification settings available, and they default to sending to everyone, regardless if they have access to that quiz or not.
We use quizzes heavily in the LMS module. Everyone in the network is barraged with notifications that it doesn't appear they should be getting.
When creating a quiz, the options are: Can take the quiz, View quiz statistics, Manage quiz.
We didn't expect that because "can take the quiz" was checked, the entire network would be receiving edit notifications.

Please split these notifications out from the Poll & Survey application, as these quizzes are used in the LMS modules, and things like new hire quizzes don't need notifications to be sent to every user across the platform.

If the Quiz application UI is connected with the Learning application, then the notifications should follow that user experience.
Thank you.
