Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.
Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.
If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*
Booking Multiple Rooms

Application/Area
Room Booking

Description
We are creating a Scheduling Request module to enable staff to schedule rooms at our location. We would then like to take these requests and book one or multiple rooms depending on the request. The room booking module only allows for one room to be booked at a time, this will require staff to create multiple bookings if they are requesting more than one room. This could be confusing. It would be great if the room booking allows for booking multiple rooms at once. Thank you for your consideration.
