Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*

Add navigation buttons to custom mobile app

Application/Area

Description

The custom mobile app for iOS uses the native device navigation (swipe left/right) instead of providing buttons for the users. That navigation does not work when viewing a document from iPads that have Stage Manager enabled. The user has to completely close the app to exit the document. Navigation buttons would provide a better user experience.
