Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.
Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.
If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*

Make pages, news articles & knowledge base articles findable when browsing server

Application/Area

Knowledge Base

Description

When adding internal links in knowledge base (and news) I use the 'browse server' button a lot, e.g. to link to user profiles and documents. It would be really useful to also be able to find pages, knowledge base articles and news in the CKfinder window that pops up.

Thanks for considering this.
