Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*

Digital Markers Go Straight to URL Instead of Document Preview

Application/Area

Documents

Description

Currently when a digital marker is used inside of Documents as a URL to an external site it opens the document preview for the digital marker where the user has to again click on the digital marker to load the external site. This is confusing to end users and causes too many extra clicks, when the digital marker is first clicked there should be an option at least for it to directly open the URL.
