Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.
Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.
If you have an immediate need for a feature please submit a Change Request instead.

**Short summary of idea***
Possibility to exclude permissions

**Application/Area**
General

**Description**
Hello,

It would be great to have the possibility to exclude a selected number of users either from Digital Assets security groups, Documents, Pages etc. without having to create a new static user group (adding everybody else, but him/her). Is this doable?

Eg. I want to publish a Digital Asset folder with the default security group (all users), but want also to exclude one person temporary.
I need this, as the people user groups are static groups and every time I add a new user, I need to keep in mind to add the person to this permission group.

I hope this make sense.
Thank you!
Best regards,

Janka
