Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*

Subordinate Hierarchy

Application/Area

People

Description

In our organization we have a hierarchy system (as I'm sure many businesses do). To put it simply -- employee < Manager < Director.

When trying to use something like Training Records, the module currently only allows the employee's immediate direct reporter to see their records.

An example to hopefully help. Jane Doe is an employee. John Smith is Jane Doe's Manager. Joe Blow is John Smith's Director.

In the intranet John Smith would have Jane Doe in their Direct Reports. And Joe Blow would have John Smith in their Direct Reports.

When John goes to Training Records they can see Jane Doe's records. However when Joe goes in, he can only see John and not Jane even though Jane is (in)directly a subordinate of his.

I would like to see Training Records be updated to allow for (using our example) Joe to see Jane's records.

Please refer to support ticket # 041839 for more info if needed.
