Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.

Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.

If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*

Give form designers ability to predetermine the size/number of options visible in a multiselect field

Application/Area

Infocapture

Description

Please give form designers ability to predetermine the size/number of options visible in a multiselect field so that a multiselect field can display all options at once.

As it stands now, only 4 options are fully visible at once when editing a ticket, and the form designer cannot change this setting. If a select list contains 8 options, for example, it is not possible to determine fully which options have been selected without scrolling the multiselect list.

Letting the form designer choose a predetermined size (perhaps terms of the number of select options visible at once?), would make for a better end user experience as the end user won't need to click into the multiselect list to see which options have been selected.
