Our Product Owners will review your ideas monthly and you will be notified on any changes made to the status of your ideas. We will let you know personally once your idea has been scheduled.
Make sure you also vote on ideas that you want to see in the product, as we will take this into account when deciding on what ideas to implement.
If you have an immediate need for a feature please submit a Change Request instead.

Short summary of idea*
Create a menu from a CSV

Application/Area
Menu Builder

Description
New clients often work out their menus on a csv with column one main items, column 2 sub menu items etc

The idea is that this should be importable to define the menu structure in one pass (which of course can then be editable as normal)
