Please feel free to submit new product enhancement ideas. Our Product Owners will review your ideas periodically and let you know personally if your Idea has been scheduled for development.

Unfortunately, it is not possible to pick up every Idea and not every Idea will receive a reply.

Make sure you also vote on Ideas that you want to see in the product, as we will take this into account when deciding on which ideas to implement.

If you have an immediate need for a feature please submit a Change Request (https://discover.claromentis.com/forms/changes) instead.

Short summary of idea*
Create Calendar Event from InfoCapture

Application/Area
Calendar

Description
We would like the ability to create a calendar event from an InfoCapture form.

We have a form that includes a date (or date/time) field and a text box. When submitting that form it would be great to have the ability to auto-create a calendar event that matches these forms boxes.

For example - I submit an IC form that says "01/25/2024" and "We have a big group from Best Dentists coming to our office!". There should be something I can check/do/activate that will automatically create a Calendar event on 01/25/2024 that has a description of "We have a big group from Best Dentists coming to our office!", and preferably also sticks the link to the IC form in there as well.
