Please feel free to submit new product enhancement ideas. Our Product Owners will review your ideas periodically and let you know personally if your Idea has been scheduled for development.

Unfortunately, it is not possible to pick up every Idea and not every Idea will receive a reply.

Make sure you also vote on Ideas that you want to see in the product, as we will take this into account when deciding on which ideas to implement.

If you have an immediate need for a feature please submit a [Change Request (https://discover.claromentis.com/forms/changes)](https://discover.claromentis.com/forms/changes) instead.

Short summary of idea*
Documents Permission Structure

Application/Area
Documents

Description
The permissions structure for Documents is a little counter-intuitive. I think it would be easier if, when disinheriting permissions from a parent folder, you could just add whoever you'd like for that subfolder or item, even if they don't have permissions to access the parent folder. This is in line with common filing systems like OneDrive and Google Drive.
