Please feel free to submit new product enhancement ideas. Our Product Owners will review your ideas periodically and let you know personally if your Idea has been scheduled for development.

Unfortunately, it is not possible to pick up every Idea and not every Idea will receive a reply.

Make sure you also vote on Ideas that you want to see in the product, as we will take this into account when deciding on which ideas to implement.

If you have an immediate need for a feature please submit a [Change Request \(https://discover.claromentis.com/forms/changes\)](https://discover.claromentis.com/forms/changes) instead.

**Short summary of idea\***  
be able to select multiple recipient in info capture

**Application/Area**  
Infocapture

**Description**  
I also noticed that the reason you have duplicated the use of each trigger is that you want to send the email to two form fields at the same time, but the picker only allows one to be selected per rule

allowing multiple form fields to be selected in a rule.

Here is the comment i received from Hannah, As she was able to notice, i have 4 triggers but 8 emails to be sent ( 2 per trigger) i had to do 2 notification rule per trigger in order to send an email to 2 different form field email.

Hope this is clear enough.

Thanks,  
Regards,  
David
