Please feel free to submit new product enhancement ideas. Our Product Owners will review your ideas periodically and let you know personally if your Idea has been scheduled for development.

Unfortunately, it is not possible to pick up every Idea and not every Idea will receive a reply.

Make sure you also vote on Ideas that you want to see in the product, as we will take this into account when deciding on which ideas to implement.

If you have an immediate need for a feature please submit a [Change Request (https://discover.claromentis.com/forms/changes)](https://discover.claromentis.com/forms/changes) instead.

Short summary of idea*
Auto Dropdown for 2nd sub level menu items

Application/Area
Menu Builder

Description
I am trying to build a 3 level menu bar. The 2nd sub menu level arrow needs to be manually clicked before the sub items are displayed which may not be intuitive to users. We prefer the sub items to be auto displayed in a similar fashion as the 2 level menu bar but perhaps horizontally to the right (->). Meaning 1st sub menu drops down and then the 2nd sub menu opens to the right. Even better if the 2nd sub menu can just auto expand when the 1st sub menu is selected.
