Please feel free to submit new product enhancement ideas. Our Product Owners will review your ideas periodically and let you know personally if your Idea has been scheduled for development.

Unfortunately, it is not possible to pick up every Idea and not every Idea will receive a reply.

Make sure you also vote on Ideas that you want to see in the product, as we will take this into account when deciding on which ideas to implement.

If you have an immediate need for a feature please submit a [Change Request \(https://discover.claromentis.com/forms/changes\)](https://discover.claromentis.com/forms/changes) instead.

Short summary of idea*

Linked articles in Knowledge Base or multiple categories.

Application/Area

Knowledge Base

Description

In documents it is possible to create "linked documents". I.e. the original document is placed in a folder. When, changes is made to the original it is apparent in all links.

This would be excellent in Knowledge base, either to be able to copy articles as links between several categories OR to be able to set multiple categories on an article.
