Please feel free to submit new product enhancement ideas. Our Product Owners will review your ideas periodically and let you know personally if your Idea has been scheduled for development.

Unfortunately, it is not possible to pick up every Idea and not every Idea will receive a reply.

Make sure you also vote on Ideas that you want to see in the product, as we will take this into account when deciding on which ideas to implement.

If you have an immediate need for a feature please submit a [Change Request \(https://discover.claromentis.com/forms/changes\)](https://discover.claromentis.com/forms/changes) instead.

Short summary of idea*

When viewing a person in People and clicking on People - Admin, display that person in People Control Panel

Application/Area

People

Description

When viewing an individual's People profile (/people/user/73937516), and as an Admin we see that we need to view fields only displayed in People Control Panel, or that we need to edit that person's information, we navigate to People Admin from the profile (three dot menu > People - Admin) hoping to see that person displayed in People Control Panel (/intranet/panels/peopleadmin_edituser.php?id=21).

However, the main People Control Panel page is displayed, which requires a second search for the individual. Having to search twice for the same person seems redundant.

It would be helpful for the People - Admin link on a People profile to open with the same person's information displayed in People Control Panel.

Thank-you
