Please feel free to submit new product enhancement ideas. Our Product Owners will review your ideas periodically and let you know personally if your Idea has been scheduled for development.

Unfortunately, it is not possible to pick up every Idea and not every Idea will receive a reply.

Make sure you also vote on Ideas that you want to see in the product, as we will take this into account when deciding on which ideas to implement.

If you have an immediate need for a feature please submit a [Change Request \(https://discover.claromentis.com/forms/changes\)](https://discover.claromentis.com/forms/changes) instead.

**Short summary of idea\***

Monitor for system outage and inform via email

**Application/Area**

General

**Description**

Our leadership has requested that an automated email be sent if our Intranet site has another outage. To be clear, the email would be sent for a user-level outage. (For example, if 1 server goes down, but the other server is handling all of the traffic, then no email would be sent.)

Thank you for considering.
