Please feel free to submit new product enhancement ideas. Our Product Owners will review your ideas periodically and let you know personally if your Idea has been scheduled for development.

Unfortunately, it is not possible to pick up every Idea and not every Idea will receive a reply.

Make sure you also vote on Ideas that you want to see in the product, as we will take this into account when deciding on which ideas to implement.

If you have an immediate need for a feature please submit a Change Request (https://discover.claromentis.com/forms/changes) instead.

Short summary of idea*

Improve Notifications Documentation

Application/Area

Communication

Description

The documentation around notifications is lacking.
First, this could be improved by documenting the remaining applications in this knowledgebase article (https://discover.claromentis.com/know...es/531). (https://discover.claromentis.com/knowledgebase/articles/531).) Only five of the 23 applications listed there have links to articles explaining each notification. It would be one thing if the article was being regularly updated, but that article hasn't been updated since May and appears to have been allowed to languish.
Secondly, that knowledgebase article is incomplete. The list does not correspond to the list in the Admin/System/Localisation settings. For instance, there is a Badge notification that is wholly missing from the available documentation.
