Please feel free to submit new product enhancement ideas. Our Product Owners will review your ideas periodically and let you know personally if your Idea has been scheduled for development.

Unfortunately, it is not possible to pick up every Idea and not every Idea will receive a reply.

Make sure you also vote on Ideas that you want to see in the product, as we will take this into account when deciding on which ideas to implement.

If you have an immediate need for a feature please submit a [Change Request (https://discover.claromentis.com/forms/changes)](https://discover.claromentis.com/forms/changes) instead.

Short summary of idea*

Add editable tooltips to user profile fields admin-side

Application/Area

People

Description

I'd like to be able to add short descriptions/instructions to our user profile fields to make it easier for people to know what data should be entered. And then be able to change that information after the field is created. I'm imagining they would show both in the "edit user profile" section and the "configure/add" field properties sections. Right now for us this would be most useful on the admin side, but I could see it also being helpful for end users. Thanks!
