Please feel free to submit new product enhancement ideas. Our Product Owners will review your ideas periodically and let you know personally if your Idea has been scheduled for development.

Unfortunately, it is not possible to pick up every Idea and not every Idea will receive a reply.

Make sure you also vote on Ideas that you want to see in the product, as we will take this into account when deciding on which ideas to implement.

If you have an immediate need for a feature please submit a Change Request (https://discover.claromentis.com/forms/changes) instead.

Short summary of idea*

Allow Wildcards in Search Recommendations

Application/Area

Search

Description

Allowing wildcards (or other similar pattern-based characters) in Search recommendations would make the system much more useful for many types of content.

Example: Users searching for an academic calendar that is updated years could be handled with a pattern of "20**-20**" instead of needing to specify one particular academic year.
