

Introduction to the Pages application

The Pages application is the webpage builder in Claromentis.

The index below offers more information on how to use the application. If you run into any issues or have a product functionality question, please [submit a support ticket](#) so our team can assist.

Pages application literature index

These guides are intended for [sysadmins & application administrators](#) - those who will advise end-users on how to use the application as well as manage the whole directory.

It is recommended to start at the top and read through in order.

Application fundamentals and configuration

[What are Pages?](#)

Further Learning

We have an e-Learning course available [here](#) on Discover that covers the Pages application in detail and would suit new administrators or those looking for a refresher.
