

What are Pages?

Within Claromentis, custom webpages can be created to suit any purpose and display information to users.

Generally, these are being created with a reason in mind, and the content placed on it is relevant to this, e.g.

- Departmental pages

A screenshot of the Claromentis homepage. At the top, there is a navigation bar with links for Home, Company, Department, Dashboards, E-Form Examples, Learning, Projects, and Book a Demo. The main content area features a large card for the 'IT Department'. The card title is 'IT Department' and the content reads: 'In an overall sense, the IT Department is responsible for providing the infrastructure for automation. It implements the governance for the use of network and operating systems, and it assists the operational units by providing them the functionality they need'. Below this are three icons: 'Drive' (Google Drive), 'Timesheets', and 'Trello'. To the right of the IT card is a 'Bug Tracker' section with a bar chart showing the number of bugs: New (10), Pending Reporter Feedback (1), Pending Developer Feedback (0), Assigned (2), Pending Testing (3), and Resolved (6). At the bottom of the page, there are two columns: 'Recent Articles' and 'Recent Questions'. The 'Recent Articles' column includes links to 'Expressions (Calculations)', 'Project Permissions', 'The Power Of Infocapture Plugins', 'Infocapture Glossary', 'Handy Tips For Issues Lists!', 'Field Types', and 'Bulk Updating Issues'. The 'Recent Questions' column includes links to 'You asked... How do I make a coffee?', 'Jennifer Langdon asked... Can you create E-forms for us?', 'Claire Bond asked... What are Infocapture plugins?', 'Jacob Black asked... What is Innovate?', 'Vanessa Wright asked... How does archiving work?', and a message from 'You' asking about training courses.

- Pages that reflect a particular office location

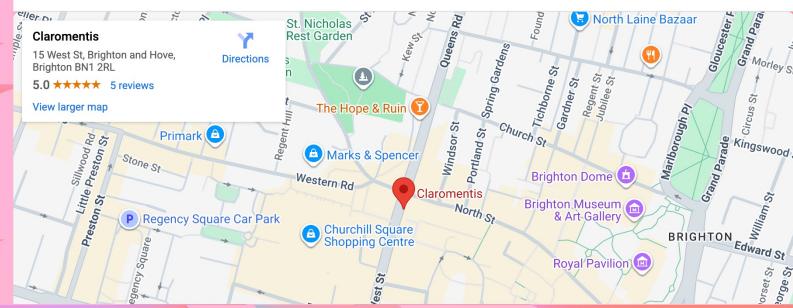

About Us

As global intranet providers, our mission is to create a beautiful and powerful digital workplace that supports learning, collaboration and productivity.

Our goal is to provide a consistent, intuitive, and beautiful workspace experience to continually support people in their everyday work, with seamless access to other specialist applications that may be vital to the company's workforce.

- Any other reason!

Your Intranet management team can decide what content needs to be displayed on your site and how best to implement this across pages.

What makes up a page?

Claromentis components can be added to pages to display information from the applications they correspond to, or any custom images, text or videos you have.

The screenshot shows the 'Components' library interface. On the left, a sidebar lists categories: 'All Categories', 'Badges', 'Calendar, Occasions & Events', 'Documents & Policies', 'Embed & Custom', 'Infocapture', and 'Learning & Knowledge Base'. The main area displays components in a grid. The first row contains 'Absence Requests' (briefcase icon), 'Analog world clock' (globe icon), and 'Anniversaries' (candle icon). The second row contains 'Announcements List' (megaphone icon), 'App slider' (link icon), and 'Articles' (document icon). The third row contains 'Available courses' (desk lamp icon), 'Badges List' (trophy icon), and 'Blog' (notebook icon). A search bar at the top right says 'Search Components'. A grid icon and a list icon are also at the top right.

Once created, Pages can be edited at any time by users with permissions and components added or removed, resized or moved around.

Your browser doesn't support video.
Please download the file: [video/mp4](#)

Each component has unique settings that allow the information it displays to be tweaked to best suit your purpose or overall look for the page.

Use a mixture of components to create individual, stylish and modern webpages for your users to interact with.

What is a site?

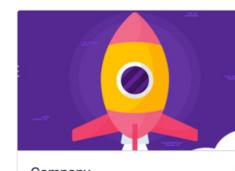

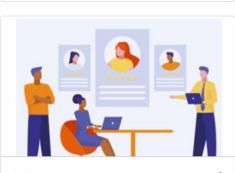

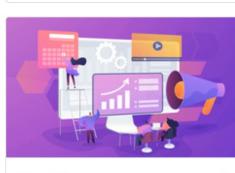

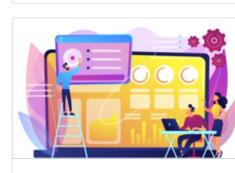

Pages themselves are stored within 'Sites'.

Think of a 'site' as a way to ringfence related pages or categorise them.

See this list of sites below; they each contain a certain number of pages.

Pages

Sites

| | | | |
|---|---|---|---|
|  |  |  |  |
| About Us | Charities | Claromentis Training | Company |
|  |  |  |  |
| Compliance | E-form and Workflow | Franchise Homepage | Homepage Muted |
|  |  |  |  |
| HR | IT | Kanban | Main |
|  |  |  |  |
| New Starter | Operations | Product Training | Project |
|  |  |  |  |
| Project Dashboard | Project Workshop | Sales | Sales Training |
|  |  |  | |
| Sandbox | Site Help | Software Training | |

Each Site will have a 'homepage' created automatically, but this can be used for whatever purpose you see fit.

Pages within the same 'Site' will have the same Site title URL fragment in front of their unique title.

Pages > Compliance

Compliance

| Compliance Homepage | ... |
|---------------------|-----|
| Internal Process | ... |
| ISO9001 & ISO27001 | ... |
| Health & Safety | ... |
| Human Resource | ... |

[View site](#) [Edit site properties](#) [Delete](#)

You can structure your sites and pages however you require; it is perfectly fine to have one Site per page.

So, when you come to create a new page, think, can this be added to an existing 'Site' as a new page, or does it work better under its own 'Site'?

What do I do with Pages?

Users can browse all the Pages they have been allowed to see in the Pages application directly, but we suggest also linking important pages in the [main menu](#) to allow quick navigation and provide structure to your user base's Intranet experience.

Your browser doesn't support video.
Please download the file: [video/mp4](#)

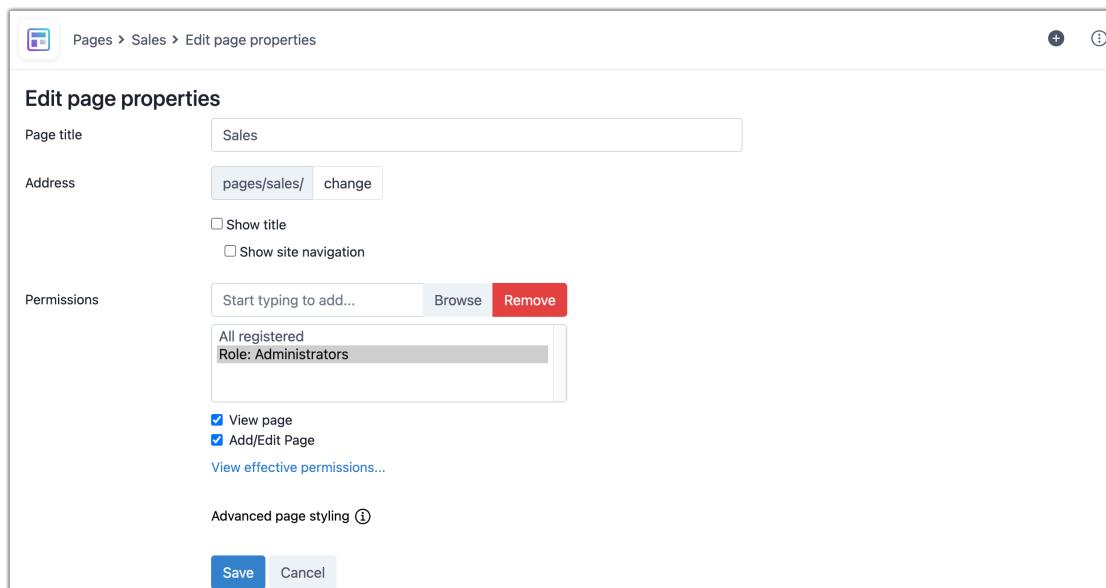

Your Intranet management team can decide on the structure of your pages, the content you want on them, who should be able to view each and how best these should be linked in the menu to build out your site over time.

New content or updates to existing pages can be handled by the users who are made responsible for this.

Who can see and edit created pages?

[Permissions](#) can be applied to pages, giving users the ability to view and/or edit them.

Just like in other claromentis applications, your team can decide which users/roles/groups should be able to perform certain abilities.

Pages > Sales > Edit page properties

Edit page properties

Page title: Sales

Address: pages/sales/ [change](#)

Show title Show site navigation

Safeguarding Refresher
Saturday, 20 June 2026

We recommend assigning responsibility for page content creation to trusted users who receive adequate training to use Pages and create your content.

This small group would be responsible for all edits to Pages, leaving the majority of your user base to view only and browse.

How do I start creating pages?

The admin side of the Pages application needs to be set up first. Please follow [this guide](#) to do so.

All other guides in our Pages series can be browsed [here](#).

Created on 2 October 2025 by [Hannah Door](#). Last modified on 12 November 2025
