

## Embed X on a Page

Currently, X disallows embedded content to be viewed without logging in first. This is not something Claromentis can control. Hopefully, X will decide to reverse this decision in the future so messages are visible.

### Step 1:

<https://publish.twitter.com/>

Enter the profile URL you wish to embed, for example, <https://x.com/claromentis>, then select 'Embedded Timeline'.

### Step 2:

Copy the code by clicking the **"Copy Code"** button.

### Step 3:

In Claromentis, [edit the page](#) you want to publish the feed on.

Click in white space to bring up the component menu.

Search for 'embed' and click on this to add it to the page.

### Step 4:

Paste the copied code into an embed component in Claromentis

Layout

Please click here to embed

Embed

URL

Settings

Title

Type

☒ Code

☐ Video

☐ Site (iframe)

☐ Document

Paste embed code here

href="https://twitter.com/Claromentis?ref\_src=twsrc%5Etfw">Tweets by Claromentis</a><script async src="https://platform.twitter.com/widgets.js" charset="utf-8"></script>

☒ Allow scroll

Submit

## Step 5:

Click 'submit' in the component to save it.

## Step 6:

Publish the page and check the content pulls through to the component as expected.
