

## What is the Locations application?

Locations is a new application in Claromentis v10.5.0+ designed to be a central place to store information about your organisation, whether it's shops, operators, or franchisees.

It allows the franchisor or head office to have an overview of your organisation, as well as allowing each area to share information and collaborate with other members.

The Locations application leverages what's already available in Claromentis, including Documents, News, Learning, and Policy Manager.

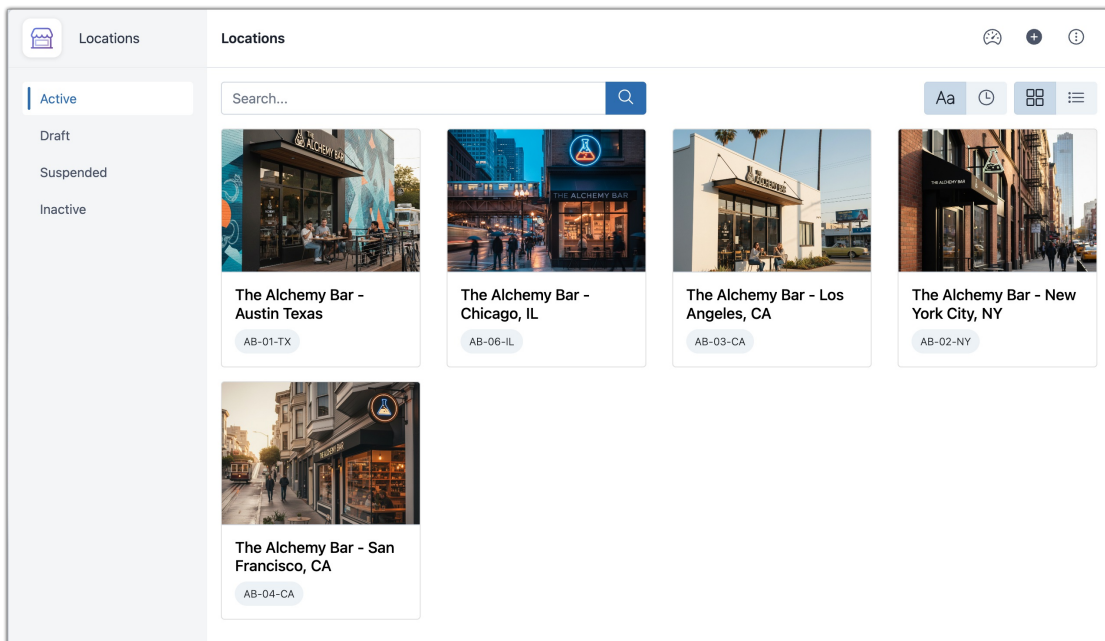

It's an integrated app that helps multi-site organisations, such as franchises, move beyond simply addressing a problem and step into an era of Digital Franchising, creating a more efficient, compliant, and ultimately more profitable network.

## What's the problem being solved?

Locations is designed to be a central place/hub for an organisation with multiple sites to manage and solve common challenges, including:

1. Maintaining consistency and compliance across the organisation
2. Communication gaps and lack of engagement
3. Operation efficiency and knowledge sharing
4. An overview of how each organisation is performing

#### Key features available now:

- Organisation/Site database - storing key information and the organisation's profile
- Operational data
- Finance & Performance data
- Customisable dashboard
- Existing apps integration
- News
- Discussion
- Document Management
- People
- Dashboard

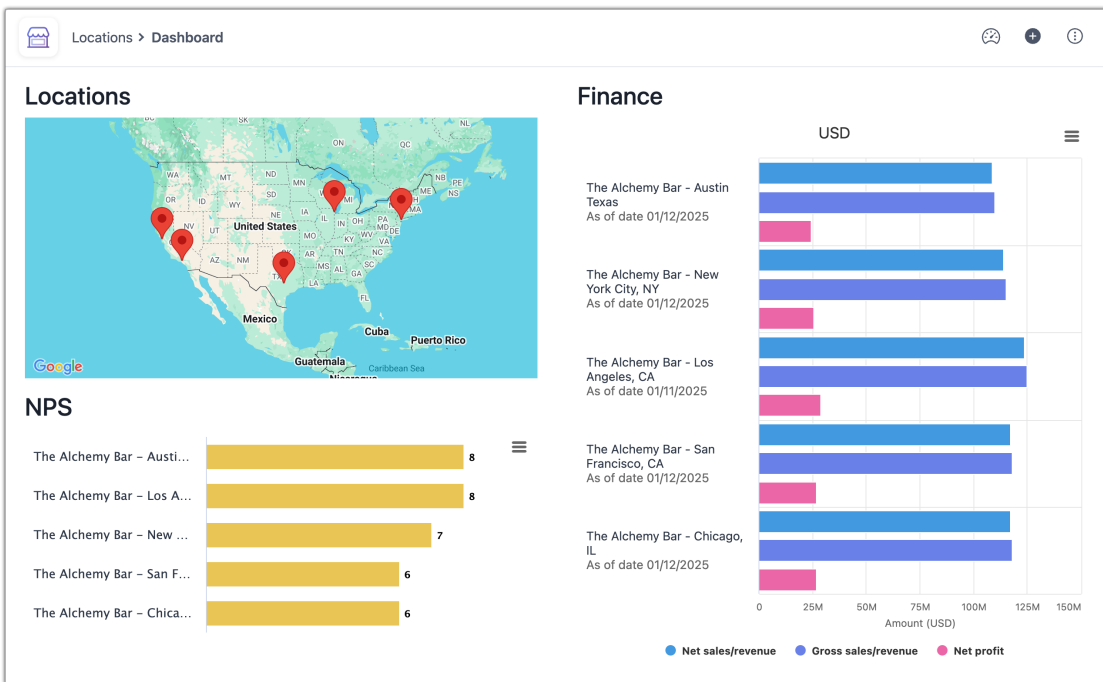

As well as a suite of apps offered within Claromentis, including InfoCapture, Learning Management System, Project Management, Policy Manager, Knowledge Base, Digital Assets, etc.

#### Features we will introduce later...

- Integrated reports
- Training Records
- Policy Acceptance
- Public API
- Custom reports

## Who is Locations for?

Locations and its features would work really well for clients in Regulated industries, Franchises, Charity organisations, and multi-site organisations.

## How do I get Locations?

Locations is included in our latest release of Claromentis, v10.5.0+.

If your site is currently below v10.5.0, we can arrange an upgrade so that you can try it out.

If you are interested, please raise an upgrade request [here](#), and our team will reach out.
